

Proposed report formats (for Signatories & Cooperating Partners)

Dave Pritchard

UNEP/CMS/RAPTORS/MOS3/Doc.14.4

Background / objectives

- **MOU para 15 – process for regular reporting by Signatories on implementation of raptor strategies**
- **Delayed; mandate to develop format given to TAG; scope interpreted as implementation of MOU and Action Plan as a whole**
- **Reporting cycle – assuming now to be reporting in advance of each MOS, to inform a synthesis / overview on each occasion**

- **Harmonising with wider CMS processes, and conveniently using the existing online submission system**

- **Two formats in [Doc.14.4](#) - one for Signatories; another for recording the five Cooperating Partners' contributions on the same issues**

Development & testing

- **Previous partial surveys of implementation, using questionnaires**
- **2019 review of the Action Plan – another more extensive survey**
- **Proposed report formats developed and endorsed by TAG**
- **2021 trial run – 33% response (Signatories) – results presented in Agenda item 12; these also informed some refinements to the format**

Other key considerations

- **Ensuring consistency / coherence of the whole approach with the proposed updates / amendments to the MOU and the Action Plan (Agenda item **14.1**)**
- **Harmonisation with reporting under CMS**
- **Very sensitive attention to issue of reporting burdens; while alive to the vital essentials of discovering how far agreed objectives are being achieved**

The formats – Doc. 14.4

- **Formats as presented in Doc.14.4 are just flat text – the actual (online) data-entry interface is more user-friendly**
- **Sections as per the 2021 trial**
- **Options for responding to particular questions**
- **Organising who compiles / collaborates in compiling the report**

A milestone opportunity

- **A more complete and systematic process for the future**

[Note - care needed re consequential amendments if any further changes are made]

- **Formats recommended for adoption!**
