

Comments from the Ministry of Agriculture, Hungary, to the Raptors MoU MOS3, Doc. 14.1, titled „Proposed Amendments to the MoU Text and Annexes, Addendum 7”

Hungary regularly updates the Standard Data Form (SDF) of the Natura 2000 network, including with data on qualifying species that are relevant for the Raptors MoU. Therefore, it is requested that the present amendment to the MoU Text and Annexes, Addendum 7, follows our most recent update of the SDF, submitted to the European Commission in January 2023. We propose to include qualifying species with a significant (category A, B or C) population on the given site (and exclude species with a population in category D, i.e. non-significant population). The proposed lists are given below in Table 1, with sites identified by the site code.

As the IBA sites largely overlap with the Special Protection Areas of the Natura 2000 network in Hungary, we also propose similar amendments in the relevant IBAs. Please, adjust the lists of the following IBAs to the lists of the corresponding Natura 2000 site, as given in Table 2. There are two exceptions among the IBAs, the Zemplén Mountains and the Hernád Valley. These two are covered with a single Natura 2000 site (HUBN10007). For these two exceptions, the recommended qualifying species are provided in Table 2.

Table 1.

Site code	Species name
HUAN10001	Clanga pomarina
	Circaetus gallicus
	Pernis apivorus
	Strix uralensis
HUAN10002	Pernis apivorus
	Strix uralensis
HUBF10001	Circus aeruginosus
	Haliaeetus albicilla
	Pandion haliaetus
HUBF30001	Circaetus gallicus
	Falco peregrinus
	Pernis apivorus
HUBF30002	Circus aeruginosus
	Falco peregrinus
	Haliaeetus albicilla
	Pandion haliaetus
HUBF30003	Circus aeruginosus
	Circus pygargus
	Falco peregrinus
	Falco vespertinus
	Haliaeetus albicilla
	Otus scops
	Pandion haliaetus
	Pernis apivorus
HUBN10001	Aquila heliaca

	Asio flammeus
	Circus aeruginosus
	Circus cyaneus
	Haliaeetus albicilla
	Milvus migrans
	Pandion haliaetus
	Pernis apivorus
	Strix uralensis
