

III. Species on the Convention Appendices

- Please confirm that the list below correctly identifies the **Appendix II** taxa for which your country is a Range State.

- Taxa listed on Appendix II at a level higher than the species have been disaggregated to the species level, in-line with the standard taxonomic references adopted by the Conference of the Parties, and included in the list where they meet the CMS movement criteria.

- In tab 2, please identify the species for which your country is a Range State and which are already included in Appendix II but have inadvertently been omitted from the list provided in tab 1.

- Tab 3 includes a list of avian species that, based on the sources used as a reference for distribution information (Avibase and BirdLife International), have been regarded as vagrants in your country, and have not been included in the list below. The list is provided for reference, and is not expected to be amended. However, if you disagree with the vagrant nature of the occurrence of a species in your country, please confirm this by including the species in the table in tab 2.

- **Please only edit columns C-D**

- Please list the CMS Appendix II listed species/subspecies for which your country is a Range State that are not included in tab 1.

Species/subspecies	Notes (optional)
Mammalia	
Rhinolophus mehelyi	Originally recorded in 1945 in the Artsvanist village, Martuni district. In total, the range encompasses the area from the Goris district's Khndzoresk village westwards to Armavir town, northwards to Yerevan city and further to the Ijevan district, Tavush Province. At present, only small groups of these bats (3–15 individuals) can be found in the vicinities of Yerevan (Karmir Blur, Jrvezh) and upstream the Hrazdan River to the Meghradzor village, Kotayk Province. The population experiences a strong decline, with only singular individuals surviving in some sites (Karmir Blur, Magili, Chaikend). Included in Red Book of Armenia.
Rhinolophus ferrumequinum	
Rhinolophus euryale	The Syunik and Vayots Dzor provinces (Areni, Chiva, Elpin, Zaritap, Martiros, Her–her, Khndzoresk villages and the outskirts of Kapan town). In recent times the population has significantly dwindled. Included in Red Book of Armenia.
Rhinolophus blasii	Armenia represents the species' northernmost range country. Occurs in 3 caves in the south of the Syunik province on the boundaries with Nagorno Karabakh, Nakhichevan and Iran. A rare and poorly studied species of limited distribution and decreasing population. Included in Red Book of Armenia.
Rhinolophus hipposideros	
Plecotus auritus	Included in Red Book of Armenia.
Barbastella leucomelas	Included in Red Book of Armenia.
Barbastella caspica	
Eptesicus serotinus	
Hypsugo savii
